Overview

This scheme of work provides the construct for Mr Johnson’s Cambridge IGCSE Global Perspectives course. The syllabus has been broken down into units with teaching and learning activities and resources for use in the classroom, or as supplements for homework or other assignments. This course has been personalized to fit the context of Busan International Foreign School to ensure that students are given plenty chances to develop and apply the skills required throughout this course. This course encourages you to be aware of global issues and offers opportunities to explore possible solutions through research, cooperation and collaboration. It promotes an open-minded approach to the complexities of the world and human existence.

Recommended prior knowledge

Students will bring their own experiences and opinions about many global issues to this course. They should have an awareness of different sources of information that will be useful for this course and also an understanding of the differences between global, national, local and personal perspectives on a global issue and how they are interconnected. The course emphasizes the development and acquisition of skills with topics acting as a vehicle to develop these skills.

Outline

The 20 possible unit choices from within IGCSE Global Perspectives are:

- Belief Systems
- Biodiversity and Ecosystem Loss
- Climate Change
- Conflict and Peace
- Disease and Health
- Education for All
- Employment
- Family and Demographic Change
- Fuel and Energy
- Humans and Other Species
- Language and Communication
- Law and Criminality
- Poverty and Inequality
- Sport and Recreation
- Technology and the Economic Divide
- Trade and Aid
- Tradition, Culture and Identify
- Transport and Infrastructure
- Urbanization
- Water, Food and Agriculture

Within the units, teaching activities focus on Whole class (W), Group work (G) and Individual work (I). The activities are introduced with Focus questions which are examples of the sort of questions that will be used to prompt prior knowledge, start discussions and build upon your course portfolio.

Within the units Group Project activities the opportunity to work collaboratively with classmates and students from other schools. Individual Research activities are focused task to better help students apply research skills individually. And, Extension activities challenge students to dig deeper into a particular topic. These give students ideas and experience of the type of work required for the Group/Individual Research in Grade 10.
Online resources
Each unit has a comprehensive list of online resources. Below is a list of some general websites that may be useful. NOTE: this is a research-oriented course, so a variety of reliable resources and knowledge were to retrieve information is vital.

<th>Topic</th>
<th>Global/International Perspectives</th>
<th>Local/National Perspectives</th>
<th>Family/Personal Perspectives</th>
</tr>
</thead>
<tbody>
<tr>
<td>Belief Systems</td>
<td>Why do people have different belief systems? What are some of the different belief systems held in different countries? How do belief systems affect a country's political system and culture?</td>
<td>What are the different belief systems in my country and in my community? How do these belief systems affect the nature of the local community? Is respect shown for other people’s beliefs?</td>
<td>What differing beliefs do my friends and family have? How do these beliefs affect their behavior and how other people view them? Have my own beliefs changed over time?</td>
</tr>
<tr>
<td>Conflict and Peace</td>
<td>Why do wars and conflicts begin? Are wars an inevitable part of being human? Where is there conflict in the world today? What is the role of the UN in times of conflict?</td>
<td>Which groups seem to be in conflict within my own country or community? Is it their interests or ideas that are conflicting? What political/ethical systems enable people to live with their differences?</td>
<td>What causes conflicts between me and my family or peers? How are these conflicts best resolved? How can this help me to understand conflict on a wider scale?</td>
</tr>
<tr>
<td>Disease and Health</td>
<td>How do infant mortality rates and expected life spans compare in different countries? What are the reasons for this? What are the major health problems facing the world today? Is access to good health care a right?</td>
<td>How good are my local health care and sports facilities? Are they equally available to everyone? Which people in my locality have the greatest health care needs? How well does my community cater for people with disabilities?</td>
<td>What can I do to keep myself healthy? Do I have a responsibility to keep myself healthy, and if so, why? Where should I go if I have a health worry or need advice about staying healthy?</td>
</tr>
<tr>
<td>Education for All</td>
<td>What is education for? What is the relationship between a country’s wealth and its rate of literacy? What effect does illiteracy have on a person and on a country? Does everyone have the right to an education?</td>
<td>What types of education are available in my area? Who uses them? How is education funded? What are the educational options available for people with learning difficulties or physical disabilities?</td>
<td>How much do I value my own education? What do I most want to learn as I grow older? If I could change the education system, what changes would I make to the curriculum?</td>
</tr>
<tr>
<td>Family and Demographic Change</td>
<td>Why do some countries have a high proportion of children or elderly people? What difficulties can this cause? What is a ‘family’? What responsibilities do family members have to one another? How or why has the family changed?</td>
<td>What sorts of families live in my local area? What proportion of households are single people? Has this changed in recent decades? What support is there in my area for families in need? How is this funded?</td>
<td>What responsibilities do my parents have to me? What responsibilities do I have to them? What sort of parent do I want to become, if at all? How would I choose to be cared for when I am elderly?</td>
</tr>
<tr>
<td>Language and Communication</td>
<td>How has the internet transformed the world? Why is it not always easy to make yourself understood in another country, even if you speak the language? Do other societies have different means of communication to those available in my country?</td>
<td>How do people in my country communicate differently with each other? How does the role of the media affect political decisions in my country? What investment has my country made in communication systems?</td>
<td>How does the way I communicate with my family and friends differ? How easy is it to be misunderstood? Why is it important to speak other languages?</td>
</tr>
<tr>
<td>Law and Criminality</td>
<td>Why do people make laws? Do we need laws? What causes some people to break laws? Who decides which laws should be in force? What are the problems caused by different law systems in different countries?</td>
<td>What are the crime rates in my country/community? What are the major crimes? What schemes are there to protect people from crime? How effective is the national/local police force?</td>
<td>Do I or my family or my friends break any laws? Do I feel safe in my local community? Has crime affected me or my family and friends? Can I do anything to help prevent crime?</td>
</tr>
<tr>
<td>Water, Food and Agriculture</td>
<td>Why do some countries have an inadequate supply of clean water? Why do some countries have a surplus of food and others do not have enough food? How can growing genetically modified (GM) crops solve food shortages around the world?</td>
<td>What foods are important in my community and why? What emergency measures are in place for coping with droughts and floods in my community or country? What causes famine and drought and how do they affect my community?</td>
<td>How much water do I use each day and for what purpose? How much food does my family waste each day and why? What decisions does my family have to make about food on a daily basis?</td>
</tr>
</tbody>
</table>
Unit 1: Belief Systems

Recommended prior knowledge
Students will bring their own experience of belief systems and that of their family and friends to this unit. They may have specific beliefs that inform their everyday lives. They may have strong opinions about issues in this topic. There are links with Unit 2 Conflict and Peace and Unit 5 Family and Demographic Change.

Context
This unit provides many opportunities for individual research work and collaborative work for the Group Project. Students are encouraged to share their work and findings with others in the class as they explore issues and undertake research.

Outline
This unit gives students the opportunity to consider people’s differing beliefs and the effects these have on their lives. It also encourages them to consider the interactions of people with different beliefs. As with all Global Perspectives work, students will be given opportunities wherever possible to research and critique sources of information, present findings appropriately, develop opinions and evaluate information and perspectives. Personal reflection time on their work is important and opportunities to do this are built into the planning.

Invite local religious leaders into school to talk about belief systems and how they influence behavior and attitudes. (* dependent on availability)  
**Individual Research**  
Investigate the influence of belief systems on teenagers in your local community.  
**Group Project**  
Work with students from another school to produce a guide to local belief systems for teenagers visiting the country on an exchange visit. | Other resources                      |
|     |                                                                                      |                                                                                               | Survey and interview responses                                                              |                                    |
| AO3 | Explore and reflect on personal perspectives on belief systems.  
Develop a line of reasoning for perspectives | **Focus questions:**  
- *What are my beliefs?*  
- *How have they changed over time?*  
**W/I.** Personal reflection on own beliefs.  
Present a brief summary of own beliefs to class. Take questions from students with differing beliefs.  
**I.** Produce a piece of writing explaining own belief systems. | Other resources                      |
|     |                                                                                      |                                                                                               | Students could bring in artifacts, food, clothing etc. to support presentation                |                                    |
Unit 2: Conflict and Peace

Recommended prior knowledge
Students will bring a variety of experiences to this topic. They may be living in/from a country with an ongoing armed conflict or they may have friends and/or relatives in the military. Many students may have seen conflicts on the news and so will have some knowledge and opinions about it. They will experience conflict on a daily basis with their family and peers. There are clear links with Unit 1 Belief Systems and Unit 7 Law and Criminality.

Context
This unit provides many opportunities for Individual research and collaborative work for the Group Project. Students are encouraged to share their work and findings with others in class as they explore issues and undertake research.

Outline
This unit gives students the opportunity to explore and reflect on the causes and effects of different conflicts both at home and abroad. As with all Global Perspectives work, students will be given opportunities wherever possible to research and critique sources of information, present findings appropriately, develop opinions and evaluate information and perspectives. Personal reflection time on their work is important and opportunities to do this are built into the planning.

| AO4  | Collaborate with others to plan and carry out a project with a clear outcome       |  **Extension**  
I. Examine different religious teachings about conflict and violence and how peace can be created.  
I. Write a letter to the UN about a conflict studied, suggesting ways in which the UN might get involved in order to bring resolution to the issues.  
I. Explore the history of attempts to create international bodies designed to promote world peace and resolve conflict between nations. Evaluate their success.  

  **Individual Research**  
Produce a critical evaluation of different ways to resolve conflict and war. This might include:  
- Political processes – formal and informal  
- Arbitration and conciliation services  
- Legal processes  
- Informal and formal discussion and negotiation  
- Seeking compromise  

  **Group Project**  
Evaluate attitudes towards the UN in two different countries collaboratively through questionnaire research. |
| AO1  | Research and understand the nature of conflict within own country                   | **Focus questions:**  
- Which groups are in conflict in my country and community?  
- What are the reasons for the conflict?  
- How might the differences be resolved or tolerated?  
  
W. Class discussion on conflicts within national borders – could be military, environmental, and political.  
G. Group work activity to use the internet and other media to research information about a chosen current national/local conflict. Include:  
- the nature of the conflict  
- the groups involved  
- background and history of the conflict  
| AO2  | Analyze and evaluate the different approaches to conflict resolution that exist      | **Online**  
Websites for the country's national and local government, relevant agencies and non-government organizations should provide information and resources. In addition country based and international media organizations also provide useful material (e.g. BBC, allAfrica.com, etc.).

### Unit 3: Disease and Health

**Recommended prior knowledge**

Students will bring their own experience of Disease and Health and that of their family and friends to this unit. They may have suffered from an illness or have family members who are ill and received health care about which they may have opinions. There are clear links with Unit 4 Education for All and Unit 8 Water, Food and Agriculture.

**Context**

This unit provides many opportunities for Individual Research and collaborative work for the Group Project. Students are encouraged to share their work and findings with others in the class as they explore issues and undertake research.

**Outline**

This unit gives students the opportunity to consider the major health problems facing the world today and the variations in the provision of health care. It encourages them to consider their own lifestyles and health need as well as those of others. As with all Global Perspectives work, students will be given opportunities wherever possible to research and critique sources of information, present findings appropriately, develop opinions and evaluate information and perspectives. Personal reflection time on their work is important and opportunities to do this are built into the planning.

Work with another school to devise an international campaign to promote healthy lifestyles for teenagers. |
Unit 4: Education for All

Recommended prior knowledge
Students will bring their own experience of education and that of their family and friends to this unit. They may have attended more than one school and may have strong opinions about education generally. There are clear links with Unit 3 Disease and Health.

Context
This unit provides many opportunities for Individual Research and collaborative work for the Group Project. Students are encouraged to share their work and findings with others in the class as they explore issues and undertake research.

Outline
This unit gives students the opportunity to consider the purpose of education and the effect it can have on people. It encourages them to consider how education impacts directly on them and others. As with all Global Perspectives work, students will be given opportunities wherever possible to research and critique sources of information, present findings appropriately, develop opinions and evaluate information and perspectives. Personal reflection time on their work is important and opportunities to do this are built into the planning.

| AO1  | Research and understand patterns of educational organization and provision within own country | **Focus questions:**  
  - What types of education are available in my area?  
  - How is education funded?  
  - What provision is there for people with special needs, for example, learning difficulties and disabilities?  

**G/I.** Students analyze a range of published materials from local schools, the local government education authorities and national government describing education in their area or country. The aim is to learn about and summarize the pattern of education available locally.  

**Key Questions for analysis:**  
  - Is education widely available to everyone?  
  - Are there any barriers to education?  
  - How can education in my area be improved?  
  - Should people have to pay for education?  
  - Should people be allowed to pay for their education? Does this create privilege and inequality?  
  - Are there equal opportunities for all?  
  - How accurate and reliable are the materials?  

I. Write a guide/brochure for parents about the educational opportunities available in your area or country.  

**Extension**  
I. Investigate home schooling in your local area and compare it with that in another country.  
I. Analyze and evaluate the differences between different types of school, for example state and private, or comprehensive and selective, by reviewing the prospectuses and websites of the schools.  
W. Visit another local school that contrasts with students’ own experience and education – by age, selection, or social background; or visit a college or university (*if possible). Interview staff and students about their experience of teaching and learning in that environment. Compare the strengths and weaknesses of each type institution.  

| AO2  | Analyze and evaluate provision for particular groups       |                                                                                      | **Online**  

Websites for the country’s national and local government, relevant agencies and non-governmental organizations should provide information and resources. In addition, country based and international media organizations also provide useful material (e.g. BBC, allafrica.com, etc.)

  - school behavior and discipline
  - uniform
  - homework
  - school councils
  - extra-curricular activities
  - curriculum
  - teaching styles
  - setting or mixed ability teaching
# Unit 5: Family and Demographic Change

**Recommended prior knowledge**
Students will bring their own experience of their family and friends to this unit. There are clear links with Unit 1 Belief Systems and Unit 4 Disease and Health.

**Context**
This unit provides many opportunities for Individual Research and collaborative work for the Group Project. Students are encouraged to share their work and findings with others in the class as they explore issues and undertake research.

**Outline**
This unit gives students the opportunity to investigate the issues surrounding family structure and responsibilities to family members, particularly the elderly. As with all Global Perspectives work, students will be given opportunities wherever possible to research and critique sources of information, present findings appropriately, develop opinions and evaluate information and perspectives. Personal reflection time on their work is important and opportunities to do this are built into the planning.

Unit 6: Language and Communication

Recommended prior knowledge
Students will bring their own experience of Language and Communication and that of their family and friends to this unit. They may be in a school situation where different languages are spoken at home, but receive their education in English. They will have good personal insight into the issues involved in translating and conversing in different languages and the nuances that exist in each one. They will also have experience and opinions of using the internet for communication (e.g. by email or social networking sites). There are clear links with Unit 4 Education for All.

Context
This unit provides many opportunities for Individual Research and collaborative work for the Group Project. Students are encouraged to share their work and findings with others in the class as they explore issues and undertake research.

Outline
This unit gives students the opportunity to consider the importance of communication between people and the influence of the internet on how people communicate. As with all Global Perspectives work, students will be given opportunities wherever possible to research and critique sources of information, present findings appropriately, develop opinions and evaluate information and perspectives. Personal reflection time on their work is important and opportunities to do this are built into the planning.

### AO4 Learning objectives

Collaborate with others to plan and carry out a project with a clear outcome.  

- age, technical knowledge, relationships, etc.
- **G.** Collate some incidents where individuals in the group have been misunderstood – identify why this happened and what was learned from the experience.
- **W.** Produce a class summary of communication barriers and some solutions to them.

**Individual Research**

Investigate the role age plays in the way people in your community communicate with each other.

**Group Project**

Compare your approaches to communication with friends and family and with students in another school in a different culture. Prepare a guide for visiting teenagers about communication ‘etiquette’.

### AO2 Learning objectives

Analyze and evaluate perspectives on acquiring a second language.

**Focus question:**

- How important is it to speak other languages?
- Why is it not always easy to be understood in a foreign language?
- In what ways do other societies communicate differently to my own?

W. Watch some of the YouTube adverts about learning languages. Give you initial responses.
W. Survey the class to find out the range of languages spoken.
I. Present and analyze the results. Consider the impact of the results.
G/W. Groups prepare arguments for and against: ‘Speaking another language is an essential skill for future success.’ Class debate.
W/G. Consider some non-verbal forms of communication that have different meanings in different cultures. Identify other forms of non-verbal communication that may have different meaning and in some cases may cause offence in different cultures.

Unit 7: Law and Criminality

Recommended prior knowledge
Students will bring their own experience of law and criminality and that of their family and friends to this unit. They may have been the victim of a crime(s) or know someone who is the victim of crime; they may have relatives who work in the police force or know people who have been convicted of a crime. There are clear links with Unit 1 Belief Systems and Unit 2 Conflict and Peace.

Context
This unit provides many opportunities for Individual Research and collaborative work for the Group Project. Students are encouraged to share their work and findings with others in the class as they explore issues and undertake research.

Outline
This unit gives students the opportunity to explore issues related to crime and the law. They will be able to consider why laws are made and why they are broken at a range of levels. As with all Global Perspectives work, students will be given opportunities wherever possible to research and critique sources of information, present findings appropriately, develop opinions and evaluate information and perspectives. Personal reflection time on their work is important and opportunities to do this are built into the planning.

Unit 8: Water, Food and Agriculture

Students will bring their own experience of water, food and agriculture and that of their family and friends to this unit. They may live in a country where food and water shortages are very much an everyday occurrence and have witnessed the impact of this. There are clear links with Unit 3 Disease and Health.

Context
This unit provides many opportunities for Individual research and collaborative work for the Group Project. Students are encouraged to share their work and findings with others in the class as they explore issues and undertake research.

Outline
This unit gives students the opportunity to investigate the issues surrounding food and water supply and consumption. They will be able to consider their own use as well as that of countries and also consider how to provide a reliable supply of food to feed the world’s growing population. As with all Global Perspectives work, students will be given opportunities wherever possible to research and critique sources of information, present findings appropriately, develop opinions and evaluate information and perspectives. Personal reflection time on their work is important and opportunities to do this are built into the planning.
